From Safety Works-OSHA Compliance Advisor

"Answers"

1. Mechanical hazards (getting body parts caught in the machine), electrical hazards (shocks and electrocution), and noise hazards that could damage hearing.
2. Guards
3. Alcohol or drugs, even prescription drugs that could make you drowsy.
4. Locked out
5. Safety glasses (or goggles) and hearing protection
6. Gloves (because they could get caught in the machine's moving parts)
